2 Question Headings

1,284 Words

HTTPS: Yes

HTML: 134KB | Language: en | Type: Product / Service Page | Intent: Transactional

i All checks run against the live HTML fetched at analysis time. Pages that load content via JavaScript may show lower scores than expected. PageSpeed data is from Google PageSpeed Insights, cached for 48 hours.

Page type detected: Product / Service Page

Checks for author name, publish date, and article schema are marked as **Not applicable** for this page type and do not reduce your score.

Website AEO Checker

49/100: Needs Work

FAQPage Schema Markup

18 / 18 pts

FAQPage structured data found on this page

FAQPage schema explicitly tells AI engines which questions your page answers, making it far more likely to be cited in AI responses

Direct Answer in Opening Paragraph

2 / 15 pts

Opening paragraph: 24 words — too short

AI engines prefer pages that answer the question directly in the first paragraph — no scrolling required

Question-Based H2/H3 Headings

8 / 15 pts

2 question-based headings found out of 28 total subheadings

Headings starting with "What", "How", "Why" etc. match how users phrase questions to AI assistants

Answer Density — Factual Content

0 / 12 pts

0 paragraphs contain statistics, data, or verifiable facts

AI engines prefer to cite content with specific facts and numbers rather than vague general statements

HowTo Schema Markup

0 / 10 pts

No HowTo schema found

HowTo schema makes step-by-step processes easily extractable and citable by AI engines

Readability — Average Sentence Length

10 / 10 pts

Average sentence length: 14 words — excellent

Shorter sentences are easier for AI to extract and quote accurately. Aim for under 18 words per sentence.

FAQ Section in Page Content

8 / 8 pts

FAQ section detected (5 Q&A pairs)

An FAQ section gives AI pre-formatted question-answer pairs that are ideal for direct citation

Structured Lists and Tables

0 / 7 pts

0 list items and 0 tables found

Structured formatting helps AI extract and present your information in summaries

Content Depth — Word Count

3 / 5 pts

1,284 words — good

Longer pages give AI more context and more quotable passages to draw from

Website GEO Checker

73/100: Fair

llms.txt File Presence

20 / 20 pts

llms.txt was found and readable

llms.txt gives AI systems explicit guidance on how to consume and reference your content.

Content Freshness

15 / 15 pts

Not applicable — publication dates are not expected on product pages

Content freshness applies to articles and editorial content. Homepages and tool pages do not require a publish date.

Entity Clarity

12 / 12 pts

122 capitalized entity candidates detected

Clear named entities help generative systems understand who, what, and where your page is about.

Unique Insight Signals

0 / 12 pts

0 paragraphs include stats/research cues

Data-backed insights make content more citable and trustworthy for generative answer synthesis.

External Source Citations

2 / 10 pts

2 external links found

Citations to external sources indicate editorial rigor and improve model confidence in your claims.

Author Attribution

10 / 10 pts

Not applicable — author attribution is not expected on product pages

Author detection applies to articles and editorial content. This page type does not require an author.

Article-Type Schema

8 / 8 pts

Not applicable — Article schema is for editorial content, not product pages

Article schema applies to blog posts, news, and guides. This page type uses different schema.

llms-full.txt or llms-small.txt

0 / 7 pts

No llms-full.txt or llms-small.txt found

Variant llms files can provide model-specific guidance and improve retrieval for different AI systems.

**.well-known/ai.txt****6 / 6 pts**

ai.txt was found and readable

ai.txt is an emerging machine-readable signal that can guide AI crawlers and agent behaviors.

AI CRAWLER ACCESS SUMMARY

AI Crawler Access

14
/ 14 Allowed

● GPTBot	● OAI-SearchBot
● ChatGPT-User	● ClaudeBot
● Claude-SearchBot	● PerplexityBot
● Google-Extended	● GoogleOther
● Applebot-Extended	● Amazonbot
● CCBot	● anthropic-ai
● Bytespider	● cohere-ai

10 of 10 key AI crawlers can access your site

Tier 1 – Citation Bots (Most Important for AI Visibility)

● GPTBot , OpenAI

Allowed

Used by ChatGPT to crawl and learn from your content

- **OAI-SearchBot** , OpenAI

Used by ChatGPT live search to find and cite your pages

Allowed
- **ChatGPT-User** , OpenAI

Activated when a ChatGPT user browses your page live

Allowed
- **ClaudeBot** , Anthropic

Used by Claude to read and process your website content

Allowed
- **Claude-SearchBot** , Anthropic

Used by Claude's search to find citation sources

Allowed
- **PerplexityBot** , Perplexity

Used by Perplexity AI to find and cite pages in answers

Allowed

Tier 2 — Secondary AI Bots

- **Google-Extended** , Google AI

Used by Gemini AI — separate from regular Google search

Allowed
- **GoogleOther** , Google

Used by various other Google AI products

Allowed
- **Applebot-Extended** , Apple

Used by Apple Intelligence features

Allowed
- **Amazonbot** , Amazon

Used by Alexa and Amazon AI products

Allowed

Tier 3 — Training Bots (Blocking These Is Often Acceptable)

- **CCBot** , Common Crawl

Training data scraper — blocking this is common and acceptable

Allowed
- **anthropic-ai** , Anthropic

Anthropic training crawler — distinct from ClaudeBot

Allowed
- **Bytespider** , ByteDance/TikTok

TikTok AI crawler — blocking often acceptable

Allowed
- **cohere-ai** , Cohere

Cohere AI training crawler

Allowed

Website Technical SEO Checker

100/100: Excellent

✔	HTTPS Page served over HTTPS HTTPS is a baseline technical trust signal for indexing and citations.	10 / 10 pts
✔	Mobile Viewport Meta Tag Viewport meta tag found Mobile rendering quality affects crawl interpretation and UX signals.	10 / 10 pts
✔	Title Length (40–65 chars) Title length: 57 characters Balanced title length improves SERP clarity and machine understanding.	10 / 10 pts
✔	Meta Description Length (120–160 chars) Meta description length: 155 characters Well-sized descriptions improve snippet quality and contextual relevance.	10 / 10 pts
✔	Canonical Tag Canonical: https://www.tecbunny.com Canonical tags help consolidate duplicates and preserve page authority.	10 / 10 pts
✔	Open Graph Core Tags og:title and og:description found Open Graph improves machine-readable summary context for social/AI ingestion.	10 / 10 pts
✔	Image Alt Text Coverage 2/2 images with alt text Alt text provides accessibility and semantic context used in content understanding.	10 / 10 pts
✔	Internal Linking 100 internal links found Internal links help crawlers discover page relationships and site architecture.	10 / 10 pts
✔	Single H1 1 H1 headings found A single clear H1 reduces topic ambiguity for crawlers and language models.	10 / 10 pts
✔	Page Size 134 KB HTML payload Smaller HTML payloads are easier to crawl quickly and parse reliably.	10 / 10 pts

Website Content Quality Checker

89/100: Good

	Word Count 1,284 words Sufficient depth gives models richer context and stronger answer coverage.	14 / 20 pts
	Heading Structure H1: 1, H2: 8, H3: 20 Consistent heading hierarchy helps crawlers and LLMs map topic structure accurately.	20 / 20 pts
	E-E-A-T Signals Author: not required for this page type Date: not required for this page type Only 2 external links (need 3+) About/Contact links found Experience, Expertise, Authority, and Trust signals tell AI engines your content is credible and worth citing.	15 / 20 pts
	Images and Alt Text 2/2 images with alt Image accessibility and semantic labels improve content interpretation quality.	15 / 15 pts
	Internal Linking 100 internal links found Internal links improve discoverability and reinforce topical clusters across your site.	10 / 10 pts
	Language Tag lang="en" Language tagging helps indexing systems and models process locale and text segmentation correctly.	8 / 8 pts
	Social Tags og:title: yes, twitter:card: yes Social meta tags provide machine-readable summaries that often assist model understanding.	7 / 7 pts

Your Top Fixes

Sorted by impact — fix these first

1

PAGE SPEED

Critical

+100 pts

Improve: Page Speed Score

Page speed data loads separately after the main report

Why AI search engines care:

Speed data is fetched from Google PageSpeed Insights and cached for 48 hours. It appears in the Page Speed section below.

2

AEO

Important

+13 pts

Add a Direct Answer in Your Opening Paragraph

Rewrite your opening paragraph to directly answer the main question this page addresses in 80+ words.

Why AI search engines care:

AI engines prefer pages that answer the question immediately without making the reader scroll first.

3

AEO

● Important

+12 pts

Improve: Answer Density — Factual Content

0 paragraphs contain statistics, data, or verifiable facts

✧ Why AI search engines care:

AI engines prefer to cite content with specific facts and numbers rather than vague general statements

4

GEO

● Important

+12 pts

Improve: Unique Insight Signals

0 paragraphs include stats/research cues

✧ Why AI search engines care:

Data-backed insights make content more citable and trustworthy for generative answer synthesis.

5

AEO

● Important

+10 pts

Add HowTo Schema Markup

Add a HowTo JSON-LD schema block for any step-by-step processes on your page.

✧ Why AI search engines care:

HowTo schema makes your steps directly extractable by AI engines answering "how to" queries.

6

GEO

● Important

+8 pts

Improve: External Source Citations

2 external links found

✧ Why AI search engines care:

Citations to external sources indicate editorial rigor and improve model confidence in your claims.

7

AEO

● Recommended

+7 pts

Rewrite Headings as Questions

Change at least 3 of your H2 or H3 headings to start with "What", "How", "Why", "When", or "Is".

✧ Why AI search engines care:

Question headings match exactly how users phrase queries to AI assistants.

8

AEO

● Recommended

+7 pts

Add Lists and Tables to Structure Your Content

Use bullet lists, numbered lists, or tables to present information that can be compared or summarised.

✧ Why AI search engines care:

Structured content is significantly easier for AI to extract and include in summaries.

9

GEO

● Recommended

+7 pts

Improve: llms-full.txt or llms-small.txt

No llms-full.txt or llms-small.txt found

✧ Why AI search engines care:

Variant llms files can provide model-specific guidance and improve retrieval for different AI systems.

10

CONTENT QUALITY

● Recommended

+6 pts

Expand Your Page Content

Add more in-depth content to reach at least 800 words. Cover the topic thoroughly with facts and examples.

✧ Why AI search engines care:

Longer, more comprehensive pages give AI more quotable passages and signal topical authority.

WHAT THIS MEANS FOR YOUR AI SEARCH VISIBILITY

This page scored 71/100 for AI readiness — rated Fair. 26 types of structured data implemented. Most key AI crawlers can access your content. Top improvements: Improve: Page Speed Score; Add a Direct Answer in Your Opening Paragraph; Improve: Answer Density — Factual Content.
